English – Upper-Intermediate
Russian - Native

Summary

An enthusiastic and highly motivated **Fullstack Software Developer**. Experienced in all stages of the development cycle for web projects from graphic design and features development to deployment and mantaining of cloud server infrastructure.

I would describe myself as flexible, responsible, open-minded, and willing to learn. I'm able to be entirely self-sufficient, however I am enthusiastic about being a part of a team, learning from stronger team members and helping others to grow.

Experience areas

Data analytics, business intelligence, content management systems, personal blogs and landing pages.

Skills

Well-versed in a rich set of **tools** from programming languages (ex. JS, C#, C++), databases (MySQL, MS SQL) to source control (Git), CI/CD (Jenkins, Gitlab and Github actions), static code analysers (SonarQube) and cloud platforms (DigitalOcean).

Experience

Itransition Group Software Engineer
May 2022 - Present
Yerevan, Armenia
